PURPOSE

This bulletin is designed to provide you with general information regarding the California Psychiatric Technician Licensure Examination process.

OBJECTIVE OF THE BOARD OF VOCATIONAL NURSING AND PSYCHIATRIC TECHNICIANS (BVNPT)

The mission of the California Board of Vocational Nursing and Psychiatric Technicians is to protect the public. Public protection is paramount to the Board and its highest priority in exercising its licensing, regulatory and disciplinary functions. Toward this end, the Board ensures that only qualified persons are licensed vocational nurses and psychiatric technicians by enforcing education requirements, standards of practice and by educating consumers of their rights.

The Board of Vocational Nursing and Psychiatric Technicians (BVNPT) is mandated by law to protect the health, safety and welfare of consumers by ensuring that all licensees possess the knowledge, skills and abilities required to practice in a safe and competent manner. This includes development of a licensing examination that tests for minimum competency for those who wish to provide professional services to the consumer.

The psychiatric technician licensure examination tests candidates on their knowledge and professional skills, as well as their ability to make judgments about appropriate techniques and methods, as applicable to the Psychiatric Technician scope of practice. This scope of practice is defined in Business and Professions Code Section 4502, which states:

“...‘psychiatric technician’ means any person who, for compensation or personal profit, implements procedures and techniques which involve understanding of cause and effect and which are used in the care, treatment, and rehabilitation of mentally ill, emotionally disturbed, or mentally retarded persons and who has one or more of the following:

- a. Direct responsibility for administering or implementing specific therapeutic procedures, techniques, treatments, or medications with the aim of enabling recipients or patients to make optimal use of their therapeutic regime, their social and personal resources, and their residential care.
- b. Direct responsibility for the application of interpersonal and technical skills in the observation and recognition of symptoms and reactions of recipients or patients, for the accurate recording of such symptoms and reactions, and for the carrying out of treatments and medications as prescribed by a licensed physician and surgeon or a psychiatrist.

The psychiatric technician in the performance of such procedures and techniques is responsible to the director of the service in which his duties are performed.

The director may be a licensed physician and surgeon, psychiatrist, psychologist, rehabilitation therapist, social worker, registered nurse, or other professional personnel.”

EXAMINATION DEVELOPMENT

The California Psychiatric Technician Licensure Examination is developed and maintained by the Board’s test vendor, Office of Professional Examination Services, a division of the California Department of Consumer Affairs. Individual examination items are developed in Item Development Conferences in a multiple-choice question format. Each item is carefully researched and validated with published references to ensure accuracy and consistency with entry level psychiatric technician practice.

ESTABLISHING THE PASSING STANDARDS

The examination measures the knowledge and skills required in current practice, and represents a standard of performance that Psychiatric Technician Subject Matter Experts agree is the minimum level of competence required to practice safely at entry level for the profession. To establish the pass/fail standard, a panel of Subject Matter Experts who are newly licensed or have direct experience with newly licensed Psychiatric Technicians reviews the content of the examination questions. A psychometrician conducts the standard setting process in accordance with the requirements of the psychometric model used.

IMPORTANT INFORMATION ABOUT TAKING AN EXAMINATION

1. All candidates will have their thumbprint taken during examination check-in and re-entry into the testing room after an approved absence. If a candidate passes the examination, the thumbprint record will be destroyed. If a candidate abandons his or her application for licensure, as determined by the appropriate regulatory authority, the thumbprint will also be destroyed. If a candidate is unsuccessful, the thumbprint record will be retained by PSI to ensure proper identification on any subsequent examination attempts. If the thumbprint doesn't match upon exit and re-entry, the candidate shall be disqualified from the examination, his or her test results invalidated, and the appropriate regulatory entity will be notified of the occurrence. The taking of the thumbprint is an additional measure to enhance examination security. The Department's Office of Professional Examination Services shall ensure that the appropriate safeguards for the storage and destruction of the thumbprint records are in place.
2. The temperature in the testing room is maintained at a moderate level. Candidates are advised to layer clothing. Acceptable layered clothing includes lightweight shirts, sweaters, and pullovers without pockets. These items must be worn upon check-in, while you wait to enter the testing room, and during your initial seating for the examination.
3. There are timing mechanisms available at the test site and on the computer console to help candidates keep track of time during the test administration. Watches or other timekeeping devices are not permitted in the examination rooms.
4. Only one candidate will be allowed to take a restroom break at a time. Candidates are required to sign out when you leave the room and when you return. If a candidate's restroom break takes longer than 5 (five) minutes, a proctor will check on the candidate and will notify the applicable regulatory entity of the occurrence, which will take appropriate action.
5. The following items are not permitted in the examination rooms:
 - All personal electronic devices, except those that are a medical necessity.
 - Cellular telephones, personal digital assistants (PDAs), recording devices, cameras, pagers, purses, notebooks, notebook computers, reference or readings material, music players, radios, electronic games, calculators, or briefcases.
 - Personal items including watches, backpacks, wallets, pens, pencils, or other writing devices, food, drinks (unless prior approval is obtained by your regulatory entity) and good-luck items.
 - Hats, baseball caps, or visors (with the exception of religious apparel), coats, shawls, hooded clothing, heavy jackets or overcoats.

During the check-in process, all candidates will be asked if they possess any of the prohibited items and all candidates will be asked to empty their pockets. If prohibited items are found during check-in, candidates shall return these items to their vehicle or other place of safekeeping.

Neither PSI, nor the Department of Consumer Affairs, shall be responsible for the items. Any candidate possessing the prohibited items in the examination room shall have his or her test results invalidated, and PSI shall notify the appropriate regulatory entity of the occurrence.

6. Copying or communicating examination content is a violation of PSI security policy and existing law. Either one shall result in the disqualification or invalidation of examination results, the denial of your license, and may subject the candidate to criminal prosecution.
7. If you are asked by a proctor to step into the lobby during your examination, the proctor will suspend your examination and you will not lose any remaining test time.

EXAMINATION RESULTS

At the end of your exam, you will receive only an examination verification report at the testing center, indicating the date and time that you took the BVNPT examination. Examination results will be mailed approximately two weeks after the examination. Your examination results are confidential and are released only to the BVNPT. To protect your privacy and maintain the confidentiality of test results, score information is not given over the telephone.

IF YOU PASS THE EXAMINATION

Candidates who have passed the examination are eligible for licensure upon receipt of fingerprint clearance from the California Department of Justice and submission of the required initial license fee.

FAILING SCORE REPORTS

The score report will indicate the candidate's overall score and grade, including the number of items answered correctly. The number correct in each content area is displayed. The primary purpose in providing a sub-score for each part of the examination is to guide candidates in areas requiring additional preparation for re-testing.

Candidates who fail the examination will be eligible to retake the examination once after a period of one month. At that time, if the candidate fails the examination a second time, the candidate will be eligible to retake the examination once every six months. There is no limit on the number of retakes. To be rescheduled, you must complete the “Application for Re-Examination” which will be mailed to you with your examination results, and attach the appropriate re-examination application fee.

SUMMARY OF SUBJECT MATTER AREAS PSYCHIATRIC TECHNICIANS

The development of a licensure examination program begins with an analysis of professional practice to ensure that the licensure examination is job-related. A psychiatric technician occupational analysis was conducted and the new test plan was adopted by the BVNPT in February 2015.

Licensees were interviewed to identify the tasks that are commonly performed by entry-level psychiatric technicians and the knowledge required to perform those tasks safely. This information was then verified by panels of Subject Matter Experts and compiled into an occupational survey. A random population of licensees was then surveyed. Response data was analyzed. A new test plan was developed that included the critical tasks, and the knowledge required to perform the critical tasks safely and competently as identified in the analysis. Effective March 1, 2016, the current test plan includes questions in the following content areas:
