EXAMINATIONS BY PSI

This Candidate Information Bulletin provides you with information about the examination process for Contractors Licensure in the State of Utah.

The Division has contracted with PSI licensure:certification (PSI) to conduct its examination program. PSI provides examinations through a network of computer examination centers in Utah and in many areas throughout the United States. PSI works closely with the State to be certain that examinations meet local as well as national requirements in basic principles and examination development standards.

QUALIFICATIONS FOR LICENSURE

Rules for licensure require an applicant to meet certain experience requirements.

In the past 10 years, a minimum of two years of full-time related experience, one year of which shall be in a supervisory or managerial position for applicants of the following contractor classifications:

E100-General Engineering B100-General Building

R100-Residential and Small Commercial

 In the past 10 years, a minimum of two years of full-time related experience for applicants of all other contractor classifications not listed above, excluding electrical and plumbing.

RECIPROCAL EXAMINATIONS

The Utah Division of Occupational and Professional Licensing will accept certain examinations an equivalent substitute for the Utah trade classification examinations required if taken in one the following states.

Arizona California Louisiana Nevada South Carolina

NOTE: Examinations given in any other state are not acceptable substitutes for the Utah trade classification examinations. See the Reciprocal State License Classification Chart on page 8 for a listing of acceptable examinations.

If the applicant was licensed in any of the above states but did not take the trade classification examination included on the Reciprocal State License Classification Chart, then they must take the Utah trade classification examination.

Experience:

If the applicant has held a comparable license in one of the above states for the number of years of experience required in Utah, then verification of the licensure for the number of years required is acceptable to verify experience for the Utah license.

Electrical and plumbing contractor classifications are not listed in the chart because a Utah Master Electrician or Master Plumbers license is required for the qualifier on electrician and plumbing contractor licenses. Please see the Utah Electrician or Plumbers license application for requirements to become a licensed electrician or plumber in Utah.

LICENSURE PROCESS

Upon completion of all licensure requirements, including passing the examination, submit a completed application for licensure to:

By U.S. Mail

Division of Occupational and Professional Licensing P.O. Box 146741 Salt Lake City, Utah 84114-6741

TAKING THE EXAMINATION BY COMPUTER

Taking the PSI examination by computer is simple. You do not need any computer experience or typing skills. You will use fewer keys than you use on a touch-tone telephone. All response keys are colored and have prominent characters. An illustration of the special keyboard is shown here. You may also use a mouse.

IDENTIFICATION SCREEN

You will be directed to a semiprivate testing station to take the examination. When you are seated at the testing station, you will be prompted to confirm your name, identification number, and the examination for which you are registered.

TUTORIAL

Before you start your examination, an introductory tutorial to the computer and keyboard is provided on the computer screen. The time you spend on this tutorial, up to 15 minutes, DOES NOT count as part of your examination time. Sample questions are included following the tutorial so that you may practice using the keys, answering questions, and reviewing your answers.

One question appears on the screen at a time. During the examination, minutes remaining will be displayed at the top of the screen and updated as you record your answers.

EXAMINATION QUESTION EXAMPLE

During the examination, you should press 1, 2, 3, or 4 to select your answer or press "MARK" to mark it for later review. You should then press "ENTER" to record your answer and move on to the next question. A sample question display follows:

IMPORTANT: After you have entered your responses, you will later be able to return to any question(s) and change your response, provided the examination time has not run out.

EXPERIMENTAL ITEMS

In addition to the number of questions per examination, a small number of five to ten "experimental" questions may be administered to candidates during the examinations. These questions will not be scored and the time taken to answer them will not count against examination time. The administration of such non-scored experimental questions is an essential step in developing future licensing examinations.

EXAMINATION REVIEW

PSI, in cooperation with the Utah Division of Occupational and Professional Licensing, will be consistently evaluating the examinations being administered to ensure that the they accurately measure competency in the required knowledge areas. While taking the examination, examinees will have the opportunity to provide comments on any questions, by using the comments key on the keyboard. These comments will be analyzed by PSI examination development staff. Although PSI does not respond to individuals regarding these comments, all substantive comments are reviewed. This is the only review of examination materials available to candidates.

SCORE REPORTING

In order to pass the examinations, you must receive a score of at least 70%.

You will receive your score report immediately following the completion of the examination.

DUPLICATE SCORE REPORTS

You may request a duplicate score report after your examination by emailing scorereport@psionline.com or by calling 800-733-9267.

TIPS FOR PREPARING FOR YOUR LICENSE EXAMINATION

The following suggestions will help you prepare for your examination.

- Planned preparation increases your likelihood of passing.
- Start with a current copy of this Candidate Information Bulletin and use the examination content outline as the basis of your study.
- Read study materials that cover all the topics in the content outline.
- Take notes on what you study. Putting information in writing helps you commit it to memory and it is also an excellent business practice. Discuss new terms or concepts as frequently as you can with colleagues. This will test your understanding and reinforce ideas.
- Your studies will be most effective if you study frequently, for periods of about 45 to 60 minutes. Concentration tends to wander when you study for longer periods of time.

Many of the reference materials listed are available for purchase at www.psionlinestore.com or by calling the PSI Online Store, toll-free, at (866) 589-3088.
